

Race and the University Memoir: Exploring the Experiences of Marginalized Students

In her groundbreaking new book, *Race and the University Memoir*, Dr. Kimberly N. Jackson offers a powerful and eye-opening exploration of the experiences of marginalized students in higher education. Through a close reading of university memoirs written by students of color, Jackson examines the ways in which race, class, and gender intersect to shape the experiences of these students.

Jackson argues that race is a central organizing principle in the lives of all students, but that it is particularly salient for students of color. These students often face unique challenges and obstacles in their pursuit of a higher education, and their experiences are often marginalized or ignored in the broader conversation about higher education.

Jackson's book is a powerful indictment of the racism that is still present in higher education today. She shows how race shapes everything from the

way students are treated by their peers and professors to the way they are evaluated and disciplined. She also shows how the experiences of students of color are often invisible to the white majority, and how this invisibility contributes to the perpetuation of racial inequality.

But *Race and the University Memoir* is more than just a critique of the status quo. Jackson also offers a vision for a more just and equitable higher education system. She argues that universities must do more to support students of color, and that they must create a more inclusive and welcoming environment for all students.

Jackson's book is a must-read for anyone interested in issues of race, class, and education. It is a powerful and eye-opening account of the experiences of marginalized students in higher education, and it offers a vision for a more just and equitable future.
